P/No. 5808-7BK

With the success of the Narva retail cable range comes the inclusion of six additional variants of Battery And Starter Cable (B&S). With the vast amount of dual battery systems on offer, battery and starter cable is fast becoming a critical part of the DIYers toolbox. This range has the length to suit dual battery installations in most passenger vehicles.

As business angles toward a self-serve environment so too does the requirements for Automotive Cable. Narva's 3–7 metre retail reels have shown consistent growth year on year indicating a purchasing preference for more economical lengths of cable rather than 30 metre trade reels.

This trend is great for the retailer too, particularly those that live in a totally barcoded self-service environment. With this in mind, the Narva range of retail cable includes all popular cables in lengths ranging from 3 to 15 metres.

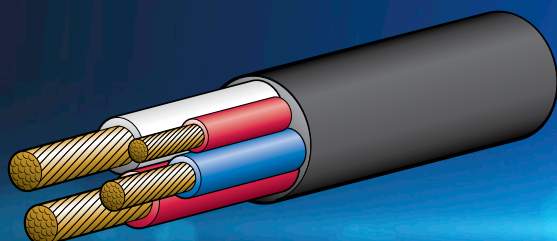

The new blisters present well, the cables are clearly identifiable and can be planogrammed to complete an in-store destination for automotive cabling. Furthermore, Narva's Battery and Starter Cable complies with Australian Standard AS/NZS 3808.

PART No.	5802-5RD
DESCRIPTION	<b>Battery Starter Cable 2mm B&amp;S 255A 5m Red</b>
BARCODE	Blister 9314464008115 Carton (6) 19314464008112

## AUTOMOTIVE CABLE Specialty Trailer Cable

*P/No. 5846-30BK*

*P/No. 5858-30BK*

*P/No. 5856-30BK*

Narva has grown to become synonymous with high quality automotive cabling. The new specialty trailer cabling uses Oxygen free copper and RoHS compliant polyvinyl-chloride (V90 PVC) insulation is used in accordance with Australian Standards AS/NZS3808 which ensures Road Train cables are compliant with Australian Design Rule ADR 63/00.

These Specialty Trailer Cable solutions come standard in 30m rolls, ideal for workshops and auto-electrical businesses.

The new Specialty Cable offers two main functions:

### **5846-30BK / 5856-30BK**

Designed to be used for electric brake applications whilst complementing the existing range of Narva trailer cable.

### **5858-30BK**

With an increased need for off-the-grid power, we've added Specialty Cable to suit a variety of DC-DC charges. This cable is ideal for businesses who specialise in dual battery installations.
