MAGNETIC MOUNT RECHARGEABLE L.E.D UNDER BONNET/WORKSHOP LAMP

P/No. 71228

Features:

- **2 x Powerful 5W COB L.E.Ds provide 6000°K of white light for broad illumination**
- **Selectable single (350lm) or double (700lm) light output**
- **Powerful magnet allows mounting to any metal surface**
- **Lithium-ion battery provides 6–15 hours of use 6.5 hours charge time via USB**
- **Lightweight, sturdy construction from aluminium, ABS and polycarbonate materials**

Expanding its SeeEzy range of L.E.D workshop inspection lamps, Narva has introduced a new style of lamp designed to allow hands free illumination in a variety of applications. Ideal for mounting on hoists, hoist arms, toolboxes, most car or truck bonnets and many other surfaces in a workshop, campsite or around the home. The new lamp features two 40° swivel adjustable lights, each containing a powerful 5W COB L.E.D. Light output can be adjusted to use one or two lights and provide 350 lumens or 700 lumens respectively. The lithium-ion battery offers between 6–15 hours of use, with a charge time of 6.5 hours via USB (AC adaptor and USB cable are included). A battery level indicator advises when charging is required.

The powerful magnet allows mounting on any metal surface while the 90 degree hinge joint provides easy adjustment for light where required. The magnet is covered with a durable foam to ensure the lamp does not scratch the surface it is mounted to. Constructed from lightweight and sturdy aluminium, ABS and polycarbonate materials, the lamp is designed to withstand a harsh workshop environment and comes backed by Narva's 3 year L.E.D warranty.

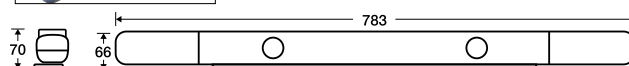

Two powerful 5W COB L.E.Ds – select from single or double lamp mode with 350 or 700 lumens of 6000°K white light. Swivel housings allow for 40° beam adjustment.

90° hinge joint allows for easy adjustment, with strong built-in magnets for a secure hold.

Battery charge indicator and simple recharge in 6.5 hours via USB.

PART No.	71228	
DESCRIPTION	L.E.D Under Bonnet Lamp	
BARCODE	Box (1)	9314464712289
